CONTENTS OF VOL. 80 Nos 1–12

NUMBER 1—JANUARY

Stimulated flux dynamics during the superconducting–normal zone sweep along a Y–Ba–Cu–O sample
R. Laiho, E. Lähderanta and A. C. Bódi 1

π-electronic structures of 'doped molecules' predicted from those of 'host molecules'
S. Y. Ren and J. D. Dow 13

Formation of metal–polymer composites by ion implantation
A. L. Stepanov, S. N. Abdullin, V. Yu. Petukhov, Yu. N. Osin, R. I. Khaibullin and I. B. Khaibullin 23

Current-induced instability in Cr–p$^+$a-Si:H–V thin film devices
J. Hu, A. J. Snell, J. Hajto and A. E. Owen 29

Improved superconducting properties of $SmBa_2Cu_3O_{7-\delta}$ films using $YBa_2Cu_3O_{7-\delta}$ buffer layers
C. Kwon, L. R. Kinder, Y. Fan, Y. Gim, A. T. Findikoglu, J. F. Bingert, J. Y. Coulter, S. R. Foltyn, D. E. Peterson and Q. X. Jia 45

Melting of the light actinides
A. C. Lawson, B. Martinez, J. A. Roberts, B. I. Bennett and J. W. Richardson, Jr 53

Magnetization measurements on single crystals of superconducting $Ba_{0.6}K_{0.4}BiO_3$
D. Hall, R. G. Goodrich, C. G. Grenier, P. Kumar, M. Chaparala and M. L. Norton 61

Magnetoelasticity of CoS_2
N. V. Mushnikov, T. Goto, A. V. Andreev and S. M. Zadvorkin 81

Coalescence of metallic clusters: a study by molecular dynamics
A. M. Mazzone 95

The Meyer–Neldel rule, space-charge-limited currents and photoconductivity in hydrogenated amorphous silicon
M. K. Rabinal and K. L. Narasimhan 113

NUMBER 2—FEBRUARY

Special Issue: ISOMES II. International Symposium on Magnetoelasticity and Electronic Structure of Transition Metal Alloys. Duisburg, Germany, 4–7 October 1998
Guest Editor: E. F. Wassermann

Preface
E. F. Wassermann 125

Relevance of magnetic instabilities to the phase stabilities of Fe alloys
M. Acet, E. F. Wassermann and W. Pepperhoff 127

Understanding iron and its alloys from first principles
P. Entel, H. C. Herper, E. Hoffmann, G. Nepecks, E. F. Wassermann, M. Acet, V. Crisan and H. Akai 141

Evidence for high-spin-to-low-spin transition under pressure in $Fe_{72}Pt_{28}$ Invar alloy
S. Odin, F. Baudelet, E. Dartyge, J. P. Itié, A. Polian, J. C. Chervin, J. P. Kappler, A. Fontaine and S. Pizzini 155

A mean-field model for structural phase transitions based on *ab initio* band calculations
P. Mohn 165

Kinetics of martensitic transformations in some ferrous and non-ferrous alloys
T. Kakeshita, T. Saburi and K. Shimizu 171

Molecular dynamics simulations of martensitic transitions
P. Entel, R. Meyer and K. Kadau 183

Spin-polarized tunnelling, magnetoresistance and interfacial effects in ferromagnetic junctions
J. S. Moodera, T. H. Kim, C. Tanaka and C. H. de Groot 195

Study of magnetization reversal in submicron wires using the giant magnetoresistance effect
T. Shinjo 207

α''-$Fe_{16}N_2$: giant magnetic moment or not?
M. Takahashi and H. Shoji 215

Stabilization of γ-Fe in the high-moment state in $(Fe/Pd)_n$ multilayers
H. Mühlbauer, Ch. Müller and G. Dumpich 227

Anisotropy in Fe layers investigated by ferromagnetic resonance
J. Pelzl, R. Meckenstock, J. Pflaum and D. Kurowski 235

Epitaxial hard–soft magnetic heterostructures as model exchange-spring magnets
J. S. Jiang, E. E. Fullerton, M. Grimsditch, C. H. Sowers, J. Pearson and S. D. Bader 247

Fe spin structure in Tb/Fe multilayers
J. Tappert, S. Neumann, J. Jungermann, W. S. Kim, T. Ruckert, R. A. Brand, W. Keune, W. Kleemann, F. Richomme, J. Teillet, F. Klose and H. Maletta 257

Influence of magnetic fields on the spin reorientation transition in ultrathin films
A. Hucht and K. D. Usadel 275

Scanning tunnelling microscopy and Monte Carlo studies of homoepitaxy on Fe(110)
U. Köhler, C. Jensen, A. C. Schindler, L. Brendel and D. E. Wolf 283

Magnetic heterostructures: examples and perspectives
H. Zabel 293

NUMBER 3—MARCH

Phase transition into the superconducting mixed state and the de Haas–van Alphen effect
V. P. Mineev 307

Thermodynamic effects on phase transformation in heterogeneous solids, and pressure-amorphization of emulsified ice
G. P. Johari 323

Point force and point electric charge in infinite and semi-infinite transversely isotropic piezoelectric solids
E. Karapetian, I. Sevostianov and M. Kachanov 331

Nonlinear transport and other properties of semiconducting $Bi_4Sr_3Ca_3Cu_4O_x + zAg_2O$ (z = 1–10 wt%) type multicomponent oxide glasses: precursors for high T_c superconductors
S. Bhattacharya, B. K. Chaudhuri and T. Komatsu 361

Electronic structure and bonding in titanium carbosulphide
B. Ramalingham, J. van Ek, J. M. MacLaren, M. E. McHenry and W. M. Garrison Jr. 379

Properties of barium titanate ($BaTiO_3$) thin films grown on silicon by rf magnetron sputtering
E. K. Evangelou, N. Konofaos and C. B. Thomas 395

A direct derivation of the optimized effective potential using orbital perturbation theory
M. S. Miao 409

Current-induced forces in atomic-scale conductors
T. N. Todorov, J. Hoekstra and A. P. Sutton 421

NUMBER 4—APRIL

Special Issue: International Workshop on Semiconducting and Superconducting Materials. Politecnico of Torino, Italy, February 1999. Part I. Silicon-based Semiconducting Materials
Guest Editors: F. Giorgis and C. F. Pirri

Introduction
C. F. Pirri and F. Giorgis 457

Plasma-enhanced chemical vapour deposition of microcrystalline silicon: on the dynamics of the amorphous-microcrystalline interface by optical methods
C. Summonte, R. Rizzoli, A. Desalvo, F. Zignani, E. Centurioni, R. Pinghini, G. Bruno, M. Losurdo, P. Capezzuto and M. Gemmi.....459

Study of the effect of different plasma-enhanced chemical vapour deposition reactor configurations on the properties of hydrogenated amorphous silicon thin films
H. Águas, V. Silva, I. Ferreira, E. Fortunato and R. Martins 475

Growth-etching competitive mechanism governing the structure and chemical composition of plasma-deposited silicon-based materials
G. Ambrosone, G. Bruno, P. Capezzuto, G. Cicala and U. Coscia 487

Optical, electrical and structural properties of hydrogenated amorphous Si–C alloys deposited by different hydrocarbon gas mixtures
G. Ambrosone, P. Capezzuto, S. Catalanotti, U. Coscia and S. Mormone 497

A local interaction simulation approach to the analysis of thin-film growth
M. Scalerandi, P. P. Delsanto and C. F. Pirri.....507

Coordination defects in amorphous silicon and hydrogenated amorphous silicon: a characterization from first-principles calculations
M. Peressi, M. Fornari, S. de Gironcoli, L. De Santis and A. Baldereschi 515

Structural and morphological properties of evaporated SiO_x films
E. Monticone, A. M. Rossi, M. Rajteri, R. S. Gonnelli, V. Lacquaniti and G. Amato 523

Antireflection coating for superconducting tunnel junction photodetectors in the visible range
M. Rajteri, M. L. Rastello, E. Monticone, R. Steni, V. Lacquaniti, F. Giorgis and C. F. Pirri 531

Ion-beam processing of hydrogenated amorphous silicon carbide grown by plasma-enhanced chemical vapour deposition
L. Calcagno, F. Giorgis, A. Makhtari, P. Musumeci and R. Reitano.....539

An experimental evaluation of transient and modulated photocurrent density-of-states spectroscopies
S. Reynolds, C. Main, D. P. Webb and M. J. Rose 547

Time evolution of the density of states of tritiated hydrogenated amorphous silicon
F. Gaspari, T. Kosteski, S. Zukotynski, N. P. Kherani and W. T. Shmayda 561

On the role of extended defects in the transport properties of Er-doped Si
A. Castaldini, A. Cavallini, B. Fraboni and S. Pizzini.....571

Surface microcharacterization of silicon wafers by the light-beam-induced current technique in the planar configuration and by attenuated total reflection spectroscopy
S. Spadoni, M. Acciarri, D. Narducci and S. Pizzini 579

Third-order nonlinear refraction in porous silicon: theory versus experiment
S. Lettieri, O. Fiore, P. Maddalena, A. Morra and D. Ninno 587

Atomic force microscopy in the surface characterization of semiconductors and superconductors
R. S. Gonnelli 599

Near-field optical investigation of porous silicon samples
M. Allegrini, F. Fuso, M. Labardi, L. Pardi, F. Sbrana, V. Mulloni, C. Mazzoleni, R. Chierchia and L. Pavesi 611

X-ray reflectivity and glancing-incidence diffraction from thin metallic Cr layers
E. Bontempi, L. E. Depero and L. Sanagaletti 623

SiC growth on Si(111) from a C_{60} precursor: a new experimental approach based on a hyperthermal supersonic beam
G. Ciullo, M. Moratti, T. Toccoli and S. Iannotta 635

Structural characterization of Ar^+-ion-amorphized 6H-SiC wafers annealed at 1100°C in N_2 or wet O_2 ambient
R. Nipoti and A. Parisini 647

Enhanced oxidation of ion-damaged 6H-SiC
A. Makhtari, V. Raineri, L. Calcagno, F. La Via, F. Frisina and G. Foti 661

Interaction of acetylene on Si(111): growth and luminescence study of $Si_{1-x}C_x$ thin layers
M. De Crescenzi, R. Bernardini, R. Gunnella, P. Castrucci, M. Casalboni, R. Pizzoferrato, G. Dufour and F. Rochet 669

Observation of quantum-confined luminescence in partially oxidized porous silicon
G. Amato, L. Boarino, D. Midellino and A. M. Rossi 679

Transport in porous silicon: the pea-pod model
I. Balberg 691

Porous silicon optical devices and Si/SiO_2 quantum wells: recent results
V. Mulloni, R. Chierchia, C. Mazzoleni, G. Pucker, L. Pavesi and P. Bellutti 705

Room-temperature luminescence from rare-earth ions implanted into Si nanocrystals
G. Franzò, V. Vinciguerra and F. Priolo 719

Synthesizing germanium nanocrystals in amorphous silicon oxide by rapid thermal annealing
W. K. Choi, H. H. Thio, S. P. Ng, V. Ng and B. A. Cheong 729

Optical gap and photoluminescence properties of amorphous silicon alloys
R. Carius 741

Inhomogeneous transport in microcrystalline p–i–n devices
M. Vieira, A. Fantoni, M. Fernandes and R. Schwarz 755

Performances of an optical ruler based on one-dimensional hydrogenated amorphous Si position-sensitive detectors produced using different metal contacts
E. Fortunato, P. Teodoro, V. Silva, I. Ferreira, Y. Nunes, N. Guimarães, F. Soares, F. Giuliani, G. Popovic, W. Brener and R. Martins 765

Current noise in quantum well infrared photodetectors: effect of electron Coulomb interaction
A. Carbone and P. Mazzetti 775

Surface-barrier Si-based photodetectors fabricated by the spray pyrolysis technique
A. Malik, M. Vieira and M. Fernandes 781

Near-infrared photodetectors based on polycrystalline Ge evaporated on Si⟨100⟩ substrates
G. Masini, L. Colace, F. Galluzzi and G. Assanto 791

Optical gain at low bias voltages in electrostatic-discharge-damaged silicon p–i–n photodiodes
H. C. Neitzert 799

Irradiated silicon detectors operated at cryogenic temperatures: the Lazarus effect
V. Granata, W. H. Bell, P. Berglund, W. de Boer, E. Borchi, K. Borer, M. Bruzzi, S. Buontempo, L. Casagrande, V. Cindro, S. Chapuy, N. D'Ambrosio, C. Da Viá, S. Devine, B. Dezillie, Z. Dimcovski, V. Eremin, A. Esposito, U. Gambardella, E. Grigoriev, E. Heijne, S. Heising, S. Janos, L. Jungermann, I. Konorov, Z. Li, C. Lourenço, M. Mikuz, T. O. Niinikoski, V. O'Shea, S. Pagano, V. G. Palmieri, S. Paul, S. Pirollo, K. Pretzl, G. Ruggiero, E. Sarnelli, K. Smith, P. Sonderegger, M. Valtonen, E. Verbitskaya, S. Watts and M. Zavrtanik 811

Andreev reflection in engineered Al/Si/$In_xGa_{1-x}As$(001) junctions
S. De Franceschi, F. Giazotto, F. Beltram, L. Sorba, M. Lazzarino and A. Franciosi 817

NUMBER 5—MAY

Special Issue: International Workshop on Semiconducting and Superconducting Materials. Politecnico of Torino, Italy, February 1999. Part II. Superconducting Materials
Guest Editors: G. Ghigo, L. Gozzelino and E. Mezzetti

Introduction
G. Ghigo, L. Gozzelino and E. Mezzetti 825

Grain boundaries in high-T_c superconductors: insights and improvements
J. Mannhart, H. Bielefeldt, B. Goetz, H. Hilgenkamp, A. Schmehl, C. W. Schneider and R. R. Schulz 827

Ac response of thin-film superconductors at various temperatures and magnetic fields
E. H. Brandt 835

Shapiro steps in superconducting films with a periodic pinning potential
L. Van Look, E. Rosseel, M. J. Van Bael, Y. Bruynseraede and V. V. Moshchalkov 847

Coherent fluxon motion in parallel arrays of long Josephson junctions
G. Carapella, G. Costabile and R. Latempa 857

Vortex confinement in oxygen-deficient Y–Ba–Cu–O films
G. Ghigo, R. Gerbaldo, L. Gozzelino, E. Mezzetti, B. Minetti, C. Camerlingo and G. Cuttone 865

Vortex lattice melting in perforated Nb/(Cu–Mn) multilayers
C. Attanasio, T. Di Luccio, L. V. Mercaldo, S. L. Prischepa, R. Russo, M. Salvato, L. Maritato and S. Barbanera 875

Thermodynamic properties of ultrasmall superconducting grains
G. Falci, R. Fazio, G. Giaquinta and A. Mastellone 883

Characterization of superconducting localized structures
M. Greco, V. Lacquaniti, S. Maggi, E. Menichetti and G. Rinaudo 889

Current-biased inductive cubic networks of Josephson junctions
R. De Luca, T. Di Matteo, A. Tuohimaa and J. Paasi 897

Superconductive technologies for the Large Hadron Collider at CERN
L. Rossi 907

Use of a dc superconducting quantum interference device as read-out electronics for radiation detectors based on superconducting tunnel junctions
M. G. Castellano, R. Leoni, G. Torrioli, F. V. Greco and P. Carelli 919

The cryogenic positioning system for a magnetic microscope
R. Vaccarone, A. Bevilacqua, P. Musico, A. Pozzo and P. Ottonello 929

Biomagnetic systems for clinical use
S. Della Penna, C. Del Gratta, C. Granata, A. Pasquarelli, V. Pizzella, R. Rossi, M. Russo, K. Torquati and S. N. Erné.....937

Microwave properties of $YBa_2Cu_3O_{7-\delta}$ films: magnetic-field-dependent order parameter fluctuations
E. Silva, R. Fastampa, M. Giura, R. Marcon, D. Neri and S. Sarti.....949

Potential of superconducting films and filters for wireless applications
A. Andreone, F. Palomba, G. Pica, M. Salluzzo, G. Cosentino and G. Panariello.....957

High-resistivity superconductor–normal–superconductor junctions for an AC Josephson voltage standard
V. Lacquaniti, S. Maggi, E. Monticone, A. Polcari, R. Steni and D. Andreone.....965

Phase lock of non-hysteretic Josephson junctions with pulse bias: analytical properties
A. Sosso.....973

Epitaxial growth of heterostructures on biaxially textured metallic substrates for $YBa_2Cu_3O_{7-x}$ tape fabrication
V. Boffa, C. Annino, D. Bettinelli, S. Ceresara, L. Ciontea, F. Fabbri, V. Galluzzi, U. Gambardella, G. Celentano, G. Grimaldi, A. Mancini, T. Petrisor and P. Scardi.....979

Optimization of $(Bi, Pb)_2Sr_2Ca_2Cu_3O_{10}$/Ag conductors for practical applications
G. Grasso, F. Grilli, A. S. Siri, F. Marti, Y. Huang and R. Flükiger.....991

Field and frequency dependences of ac magnetic measurements as a probe of nonlinear flux diffusion in high-temperature superconductors
D. Di Gioacchino, A. M. Testa, S. Pace, P. Tripodi and F. Celani.....997

Vortex pinning and anisotropy in Ag/$(Bi, Pb)_2Sr_2Ca_2Cu_3O_{10}$ tapes by means of surface columnar defects
E. Mezzetti, R. Gerbaldo, G. Ghigo, L. Gozzelino, B. Minetti, L. Martini and G. Cuttone.....1003

Surface nanostructuring and damage morphologies along 2 GeV gold-ion-implanted tracks
L. Gozzelino, R. Gerbaldo, G. Ghigo, E. Mezzetti, B. Minetti, P. Schätzle, G. Krabbes, E. Carlino and G. Cuttone.....1015

Investigation of the vortex confinement mechanisms in melt-textured $YBa_2Cu_3O_{7-x}$ with ion-induced surface nanostructuring
L. Gozzelino, R. Gerbaldo, G. Ghigo, E. Mezzetti, B. Minetti, P. Schätzle, G. Krabbes, E. Carlino and A. Rovelli.....1025

Conductance anisotropy in granular high-T_c superconductors in a magnetic field
D. Daghero, A. Masoero, P. Mazzetti, A. Stepanescu and P. Tura.....1039

Structure refinement of infinite-layer superlattices
L. De Caro, C. Giannini, L. Tapfer, G. Balestrino, P. G. Medaglia and G. Petrocelli 1047

Transmission electron microscopy studies of the microstructure of Si layers grown on GaAs(001) under an excess As or Al flux
E. Carlino, L. Sorba, A. Franciosi, S. Heun and B. H. Müller 1055

A model for the interpretation of holographic and Lorentz images of tilted reverse-biased p–n junctions in a finite specimen
M. Beleggia, R. Capelli and G. Pozzi 1071

A contribution to the study of the Hg–Ba–Cu–O system
G. A. Costa, M. M. Carnasciali, A. Farnè and P. Mele 1083

The electronic conductivity mechanism in Bi–Sr–Ca–Cu–O glass–ceramics
L. Murawski, B. Kościelska, R. J. Barczyński, M. Gazda, B. Kusz, B. Andrzejewski, S. Stizza and S. Chudinov 1093

A study of $YBa_2Cu_3O_x$ films grown by metal–organic deposition on different substrates
A. Agostino, P. Benzi, L. Operti, N. Rizzi and P. Volpe 1105

The influence of silver and Ag(In) alloy on Y–Ba–Cu–O equilibria around the $YBa_2Cu_3O_{7-\delta}$ superconducting phase
G. A. Costa, E. A. Franceschi and P. Mele 1113

Ferromagnetic–superconducting thin-film layered device: critical current behaviour
L. Callegaro, V. Lacquaniti, S. Maggi, E. Puppin, O. Rampado, S. Ricci and R. Steni 1127

Roughness evolution of Nb films with thickness
A. Esposito and E. Monticone 1133

NUMBER 6—JUNE

Electronic structure of $(Na_{1/2}Bi_{1/2})TiO_3$ and its solid solution with $BaTiO_3$
Y.-N. Xu and W. Y. Ching 1141

Structural, microstructural, optical and dielectric properties of $Ba_{0.75}Sr_{0.25}TiO_3$ thin films deposited by sol–gel
S. A. Nasser and D. A. Payne 1153

Heat capacity and microstructure of ordered and disordered Pd_3V
M. E. Manley, B. Fultz and L. J. Nagel 1167

Systematics for trivalent and divalent rare-earth sulphides
W. M. Temmerman, A. Svane, P. Strange, Z. Szotek and H. Winter 1179

Ultrasonic study of the elastic and nonlinear acoustic properties of single-crystal triglycine sulphate in the ferroelectric and paraelectric phases
G. A. Saunders, A. Dunk and M. Cankurtaran 1193

Absorption of infrared radiation by a giant enhancement of two-phonon lattice modes at a dielectric–conductor interface
S. G. Yastrebov, R. Smith and V. I. Ivanov-Omskii 1219

Explanation of the exotic superconductors by a valence-fluctuation pairing mechanism
B. Brandow 1229

NUMBER 7—JULY

Impact of monomer evaporation on the statistics of island arrays formed in thin film deposition simulations
D. A. Robbie and P. A. Mulheran 1299

Supercurrent decay by vortex nucleation in the presence of an array of pinning centres: a renormalization group approach
R. Iengo and G. Jug 1311

Mobility-edge shift during diborane doping in hydrogenated amorphous silicon and hydrogenated amorphous silicon carbide
A. Hadjadj, P. Roca i Cabarrocas and B. Equer 1317

Thermal equilibrium, the Staebler–Wronski effect and potential fluctuations in lithium-doped hydrogenated amorphous silicon
P. Agarwal and S. C. Agarwal 1327

Perturbation approach of the injection effect on the electron-beam-induced current efficiency in lightly doped semiconductors
R. J. Tarento, D. E. Mekki and N. Tabet 1347

Quantum transport equations for single-band and multi-band semiconductors. I. Formulation
P. Zhao, N. J. M. Horing and H. L. Cui 1359

Peak effect in the superconducting mixed state of bulk Mo–Re alloys: a dc magnetization study
S. Chaudhary, S. B. Roy, P. Chaddah, P. K. Babu, R. Nagarajan and L. C. Gupta 1393

Composite fermions and quantum Hall systems: role of the Coulomb pseudopotential
A. Wójs and J. J. Quinn 1405

NUMBER 8—AUGUST

The force-free case in three-dimensional superconductors: a computational study
J. F. Blackburn, A. Campbell and E. K. H. Salje 1455

Electric field of a charged dielectric cylinder with counterions: application to B-DNA
D. Ouroushev 1473

Spontaneous dimer order, excitation spectrum and quantum-phase transitions in the $J_1 - J_2$ Heisenberg model
V. N. Kotov, J. Oitmaa, O. Sushkov and W. H. Zheng 1483

Quantum-chemical studies of Nb-doped $CaTiO_3$
F. Erazo and A. Stashans 1499

Electrochemical breakdown in thin Nb_2O_5 films
G. Jouve 1507

Cylindrical Fermi surfaces formed by a flat magnetic Brillouin zone in uranium dipnictides
D. Aoki, P. Wiśniewski, K. Miyake, N. Watanabe, Y. Inada, R. Settai, E. Yamamoto, Y. Haga and Y. Onuki 1517

Structural relaxation within the grain boundaries of nanocrystalline Ni_3Fe
H. N. Frase, B. Fultz, J. L. Roberts and S. Spooner 1545

Effects of the thermal driving forces on the distribution of critical current densities in high-T_c superconductors
A. E. Khalil 1555

Higher-order anharmonic contributions to the Debye–Waller factor
R. C. Shukla 1567

Dependence of structure-property relations on substituent distributions in lead zirconate titanate
Q. Tan, Z. Xu and D. Viehland 1585

NUMBER 9—SEPTEMBER

The Haldane bosonization scheme and metallic states of interacting fermions in *d* spatial dimensions
B. Farid 1599

On Fermi systems with strong forward scattering in *d* spatial dimensions
B. Farid 1627

Vacancy formation energies and mechanisms of ion–molecule reactions from ionic sublimation measurements on potassium bromide single crystals
M. F. Butman, A. A. Smirnov, L. S. Kudin and Z. A. Munir 1653

Elastic moduli of the C15 Laves-phase materials TaV_2, $TaV_2H(D)_x$ and $ZrCr_2$
K. Foster, J. E. Hightower, R. G. Leisure and A. V. Skripov 1667

Electronic structure study of the dependence of the pseudogap on the icosahedral cluster size and the glue atoms
P. Modak, R. S. Rao, B. K. Godwal and R. Chidambaram 1681

Non-Mott metal–insulator transition from Hartree–Fock theory
C. Degli Esposti-Boschi and L. Ferrari 1693

The interpretation of pulsed-excitation transient photoconductivity in disordered semiconductors
J. M. Marshall 1705

Experimental thermoelectric power of liquid silver–germanium alloys interpreted with an analytical energy-dependent calculation
A. Makradi, H. Chaaba and J. G. Gasser 1727

NUMBER 10—OCTOBER

Composition dependence of positron states in zincblende $Ga_{1-x}In_xN$
N. Bouarissa 1743

The structural origin of broken chemical order in $GeSe_2$ glass
P. Boolchand and W. J. Bresser 1757

Allometric scaling in evolutionary biology: implications for the metal–insulator and network glass stiffness transitions and high-temperature superconductivity, and the converse
J. C. Phillips 1773

The structural and superconducting properties of $R_{1-2x}Ca_xTh_xBaSrCu_3O_{7-\delta}$ (R = Eu or Dy; $0.0 \leq x \leq 0.1$)
T. B. Waje, I. K. Gopalakrishnan and J. V. Yakhmi 1789

On the splitting of SiH absorption bands in infrared spectra of hydrogenated microcrystalline silicon
D. Stryahilev, F. Diehl, B. Schröder, M. Scheib and A. I. Belogorokov 1799

Visible photoluminescence and electroluminescence in wide-bandgap hydrogenated amorphous silicon
K. Luterová, I. Pelant, P. Fojtík, M. Nikl, I. Gregora, J. Kočka, J. Dian, J. Valenta, P. Malý, J. Kudrna, J. Štěpánek, A. Poruba and P. Horváth 1811

Crystallization kinetics driven by two simultaneous modes of crystal growth
M. Fontana, B. Arcondo, M. T. Clavaguera-Mora and N. Clavaguera 1833

Short-range order and luminescence in amorphous silicon oxynitride
V. A. Gritsenko, Yu. G. Shavalgin, P. A. Pundur, H. Wong and W. M. Kwok 1857

NUMBER 11—NOVEMBER

Vibrational order in $Pu_{0.98}Ga_{0.02}$
A. C. Lawson, B. Martinez, R. B. Von Dreele, J. A. Roberts, R. I. Sheldon, T. O. Brun and J. W. Richardson, Jr 1869

Magnetic-field-induced two-dimensional electron lattice with a conjugate flux lattice
F. Y. Huang 1893

Modelling of the magnetoelastic wave amplitude in amorphous ferromagnetic ribbons
V. Iannotti and L. Lanotte 1903

Hydrogen-implantation induced silicon surface layer exfoliation
T. Höchbauer, A. Misra, R. Verda, M. Nastasi, J. W. Mayer, Y. Zheng and S. S. Lau 1921

X-ray spectroscopy investigation of the electronic structure of SnS_x and $Li_{0.57}SnS_2$ compounds
A. Gheorghiu-de La Rocque, E. Belin-Ferré, M. F. Fontaine, C. Senemaud, J. Olivier-Fourcade and J. C. Jumas 1933

Magnetic response of E_1 electrons in semiconductor crystals
S. O. Sari 1943

Effect of heavy ion irradiation on near-surface microstructure in single crystals of rutile TiO_2
F. Li, P. Lu, M. Ishimaru and K. E. Sickafus 1947

Phonon induced stripe formation and charge ordering in high-T_c superconductors
A. Bussmann-Holder, A. Simon, H. Büttner and A. R. Bishop 1955

Radiofrequency impedance measurements at 2 MHz on $YBa_2Cu_3O_7$ epitaxial films
V. Pant, R. G. Goodrich, M. G. Godbole and D. H. Lowndes 1961

Defects in silicon induced by high energy helium implantation and their evolution during anneals
M. F. Beaufort, E. Oliviero, H. Garem, S. Godey, E. Ntsoenzok, C. Blanchard and J. F. Barbot 1975

On the nucleation of recrystallization by a bulging mechanism: a two-dimensional vertex simulation
D. Weygand, Y. Bréchet and J. Lépinoux 1987

NUMBER 12—DECEMBER

Special Issue: 12th Physics Summer School on Quantum and Classical Chaos. Canberra, Australia, January 1999
Guest Editors: M. Gulácsi and S. Kun

Preface
M. Gulácsi and S. Kun 1997

Spectral statistics for quantum graphs: periodic orbits and combinatorics
H. Schanz and U. Smilansky 1999

Quantum chaos in atom optics
G. J. Milburn and S. Dyrting 2023

Chaos, response to harmonic fields, and quantum–classical correspondence
P. V. Elyutin 2057

Wave propagation in disordered media
P. A. Robinson 2087

Experimental study of quantum chaos with cold atoms
M. G. Raizen 2109

Random-matrix theories in quantum physics and classical chaos
H. A. Weidenmüller 2119

Quantum chaos, localization and tunnelling: microwave experiments on model geometries
S. Sridhar 2129

Statistical theory of finite Fermi systems with chaotic excited eigenstates
V. V. Flambaum and G. F. Gribakin 2143

Subject index 2175

Index of authors (with titles of papers) 2181
